

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! I have been out of work for two years and I am tired of paying so many tax's for cable tv and phone service when most of the satellite's being used for those transmissions were paid for by tax dollars to put them in space. If you need more money make Dish/DirectTV pay the tax payers back for putting them in space in the first place.

Sincerely John Schulker 65 S. Rolling
